

Easy 'Three Squares' shawl

The shawl can be knitted or crocheted. It is made up with 3 squares, approximately 18 to 20 inches each side. The size depends on the size of the person.

The three squares are then sewn / crocheted together.

The collar is approximately 6 inches wide. Try your shawl on and decide how wide you wish to make the collar.

These shawls would be good for patients that can't get up easily and can be just slipped behind them or for breast cancer patients who find it hard to slip their arm into garments.
